

Liquid Collagen Biocell FAQs

How many bottles should someone purchase?

We recommend committing to a consistent 90-day supply (**2 Bottles of BioCell per month**), which includes two bottles monthly for optimal dosage. Each bottle contains 30 servings, with a tablespoon in the morning and a tablespoon at night.

How long will that last?

Each bottle has 30 servings (tablespoons) which will last 15 days if taking the recommended clinical dose of 2 tablespoons daily.

Which formula is best for me?

Refer to the provided formula cheat sheet for guidance on selecting the most suitable option based on your needs. [**CLICK HERE**](#)

Can you take more than 1 kind at a time?

Yes, you can combine different formulations by taking one tablespoon of each daily to reap the benefits.

Are they all pregnancy safe?

Pure and Life formulations are pregnancy-safe. However, consult with your physician before use, especially if you have allergies or are diabetic.

Are there contraindications?

We recommend Pure formulation for diabetic patients or individuals with allergies. Always consult with your physician before starting any supplementation regimen.

Will it affect medicine I take?

No, there are no known medication interactions. However, always consult with your physician.

How many clinical studies are there, and where are they?

Yes, Liquid Collagen Biocell is backed by 7 patents and has undergone 37 clinical trials, demonstrating its efficacy. Refer to the provided clinical studies documentation for detailed information on the studies conducted. Check out: [**CLICK HERE**](#)

How long does it take to work?

Clinical results are noticeable after 28 days, with optimal results typically seen after 90 days of consistent use.

Is Biocell FDA approved?

Biocell is FDA regulated and tested at the highest standards. For legal terminology, please refer to our FAQ section on the website. [READ MORE HERE](#)

WHY DO OTHER BRANDS HAVE HIGHER DOSES OF COLLAGEN THAN THE LIQUID BIOCELL MATRIX?

IT SYNTHESIZES OUR OWN PRODUCTION OF COLLAGEN AS WELL AS SUPPLEMENTING IT.

Most bovine, porcine or marine-sourced brands of collagen have to fill their products with large dosages because they are not very bioavailable and therefore take many mg's to even begin to accumulate in the body. In fact, most products do not absorb past 15% and fewer still can clinically prove absorption. Due to the lack of clinical substantiation for most collagen products, today's marketing tactics often have an "everything but the kitchen sink" attitude. By contrast, the BioCell Liquid Collagen/HA Matrix has been proven for rapid absorption with a source that naturally mirrors the human body. It has been shown in multiple clinical trials published in major scientific journals to increase the levels of collagen and HA in the body.

WATCH HERE

Multi-collagen is often marketed as superior to single source collagen, but that's a misnomer. It's a marketing tactic employed mostly by companies with little to no published clinical validation to support their products. The source of collagen is extremely important, especially knowing exactly where a product is sourced, and what safety measures and third-party validation is ensuring product safety and efficacy. Even more significant is how collagen and HA is broken down into the body, through hydrolyzation into peptides that can be easily absorbed. 1.5 kDa is the ideal molecular weight for absorption into the bloodstream. The molecular weight of supplements is rarely validated by supplement companies. The BioCell Liquid Collagen/HA Matrix manufacturing process is certified by three third-party auditors, NSF, NPA and cGMP (Current Good Manufacturing Practices) as set forth by the US Food & Drug Administration.

WHY IS BIOCELL LIQUID COLLAGEN/HA MATRIX MORE EFFECTIVE THAN OTHER BRANDS?

IT MIRRORS HUMAN CARTILAGE.

1. As it is almost identical, the body recognizes and accepts it as its own, increasing collagen type I, II & III production and HA levels.
2. As of now, no single source matches the composition of human cartilage. This is why it is patent-protected and the only one available.

WHY IS BIOCELL LIQUID COLLAGEN/HA MATRIX MORE EFFECTIVE THAN OTHER BRANDS?

THE MOLECULAR WEIGHT IS HIGHLY ABSORBABLE. Using a proprietary process, it's converted into peptides that are easily absorbed by our bodies. This is called bio-optimization. The body easily absorbs an average molecular weight of 1.5 kDa (Kilo Dalton). 1.3-1.8 is considered the "sweet spot" for absorption. In contrast, most collagens on the market contain very large, heavy molecules, which do not bind to cells and pass through the digestive system.

IT IS A LIQUID DELIVERY SYSTEM. Liquid delivery systems play a key role in absorption. The Physicians' Desk Reference states that up to 90% of nutrients in liquids are absorbed within 30 seconds, compared to pills and powders that are lucky to achieve 10-30% absorption over time. Under the tongue, you will find the most absorbable capillaries in your body. Liquid BioCell Collagen/HA Matrix takes advantage of this with a potent, nutraceutical micro-dose delivery that easily achieves sub-mucosal delivery.

WATCH HERE

IT INCREASES HA LEVELS IN THE BODY. The liquid Collagen/HA matrix is proven to increase the levels of HA in the bloodstream by 6,000% in just 28 days. It affects all tissues, including joints, connective tissue, skin, hair follicles, and even eyes.

WATCH HERE

IT SLOWS THE BREAKDOWN OF HA ALREADY PRESENT IN THE BODY. Only BioCell Liquid Collagen/HA Matrix is proven to inhibit hyaluronidase, the enzyme responsible for breaking down glycosaminoglycans in our bodies, which are essential for healthy aging.

WATCH HERE

IT SYNTHESIZES OUR OWN PRODUCTION OF COLLAGEN AS WELL AS SUPPLEMENTING IT. It stimulates fibroblasts, which are the cells responsible for making Collagen the digestive system.

WATCH HERE

IT IS A SINGLE-SOURCED COLLAGEN.

- The importance of a single source cannot be overstated. The majority of collagen is derived from ground-up pig (porcine) and cow (bovine) hooves, hides, snouts, eyelids, tails, and other parts, and the quality is loosely regulated. A marine collagen is derived from fish scales and other parts and can contain microplastics and even radiation.
- BioCell Liquid Collagen/HA Matrix is derived from a non-GMO, hormone-free chicken sternum source. Free of blood vessels, lymphatics, or nerves that are known to carry toxins and impurities.
- It is a naturally-occurring matrix of bioavailable collagen, hyaluronic acid, and chondroitin sulfate, and is a safe by-product, free of antibiotics and sourced from North American suppliers.

Additional FAQs

What percentage will I get from customers via drop shipping?

Drop shipping commissions range from 10% to 36%, with quarterly profit shares if applicable.

If I sell it off the shelf, what should I retail it for?

Refer to the retail document for pricing guidance. Retail prices typically range around \$82.99.

Is there a way to waive the annual fee?

As a private contractor, you have the option to absorb the annual fee for clients if desired. Please inquire for more information.

What recognition has Liquid Collagen Biocell received?

Liquid Collagen Biocell is arguably the most-awarded Collagen/HA supplement globally, with notable accolades including:

- 2020 NUTRACHAMPION
- Finalist, Product Special Innovation, Pure Beauty Magazine, 2020
- Best Health Drink (awarded for Modere Logiq™), Beauty Shortlist Mama & Baby Awards, 2019
- Finalist, Best New Body Care (awarded for Trim), Pure Beauty Magazine, 2019
- Best Weight Management Supplement (awarded for Trim), SupplySide West Editor's Choice, 2018
- Finalist, Product Innovation Award (awarded for Trim), DSA Awards, 2018
- #1 Anti-aging Essential, TasteForLife Supplement Essentials, 2015
- Best Joint Health Supplement, SupplySide West CPG Editor's Choice, 2015
- Reader's Ingredient of the Year, Nutraingredients Award Winner, 2015
- Editor's Pick, Remedies Magazine, 2015
- Finalist, Most Innovative Dietary Ingredient, Nutraceutical Business & Technology Award, 2012
- Best Bone & Joint Health Ingredient, Frost & Sullivan Award Winner, 2011
- Exemplary US Brand Recognition, Beauty From Within Conference, 2011
- Anti-aging Feature Product - CBS, 2011
